EXPERIENCE

The Gnar Company

Software Developer

APRIL 2016 - JANUARY 2018

- Built a series of APIs for the LevelUp Rails app to make new food providers available to customers via their mobile app
- Added new features to the Qeepsake Rails app as the sole engineer on the project; features included photo uploads, tiered feature accessibility, and prototype Facebook Messenger integration
- Coded and attended meetings remotely over the course of 6 months while traveling across Europe, Africa, and South America

MeYou Health

Software Developer

MARCH 2014 - JANUARY 2016

- Coded as part of a development team for Walkadoo and Well-Being Tracker in an Agile environment with weekly deliverables
- Built an internal dashboard to display user metrics for five products, driving metric-based development; utilized product APIs to gather data and display them via a dynamic front end view
- Created a team competition feature in Walkadoo to track step counts for thousands of users; built tools to calculate team scores and motivate users to achieve higher step totals

Harmonix Music Systems

QA Lead

OCTOBER 2007 - JUNE 2012

- Integrated Agile methodology with the QA process for Dance Central 2 by training testers and embedding them on feature teams, resulting in increased codebase knowledge and 25% more bugs found than the previous project
- Led the Rock Band song QA team as it grew from 5 to 10 testers; created and implemented QA processes resulting in a testing capacity increase of 400% for weekly deliverables

General Electric Energy

Gas Turbine Controls Engineer / Classroom Trainer

OCTOBER 2001 - OCTOBER 2006

- Managed crews of laborers and specialists on \$10MM+ energy projects in 7 different countries; acted as liaison to work cooperatively with GE customers to resolve issues
 - Created a troubleshooting process and software tool to streamline the testing of software and equipment on a gas turbine project
 - Developed and implemented innovative ways to integrate computer simulations, lectures and lab exercises into a curriculum used to teach 20+ classes at a world-class gas turbine training facility
-

INTERESTS

- Staying active via biking, yoga, snowboarding and running; amateur DJ and musician; daily meditation
-

EDUCATION

Web Development Immersive Coding Course

General Assembly

SEPTEMBER 2013 - DECEMBER 2013

Bachelor of Science in Mechanical Engineering

University of Delaware

SEPTEMBER 1997 - MAY 2001
